

Dear Parents,

Your child will soon be participating in a Museum Field Science Program. Since 1978, The Museum has provided safe and informative field trips for students and adults throughout Alabama. Our mission is to provide students and teachers with experiential education in field science.

Our philosophy for these trips is to enhance classroom learning of science through hands-on field experiences. So, during the field trip your child will be participating in a variety of outdoor activities. We ask that you help to make this a positive experience for your child by being certain that he or she is dressed appropriately for the weather and the conditions.

Your child should be prepared to get WET and MUDDY throughout the trip. Please review the enclosed information – it will assist you in preparing for the trip. Also, a health form must be completed and returned to the classroom teacher before the field trip.

Remember that being prepared will help to make this a rewarding, fun, and meaningful experience. Thank you for your help.

Sincerely,

Museum Education & Outreach Staff
